SCIENCE

Taking into account that all living things have different types of adaptation, human beings also adapt to the environment. Even criminals adapt to the possibilities given by the situations. We are in C.S.I. PINOS and we must analyze the conduct of the criminals, which lead us to this investigation, but also analyze the conduct of predators when they kill.

You must choose 1 animal and compare it to the sample case (Zodiac Killer), classifying the characteristics of the individual and his/her adaptation to the environment by filling the chart proposed
